

Strategic Plan Executive Summary (2016 – 2020)

In the summer of 2015, Mohave Community College began developing its 2016 - 2020 Strategic Plan by conducting an Environmental Scan of the College's service area – which included Mohave County and adjacent areas of eastern California, southern Nevada and southern Utah. The Scan looked both forward and backward in time as a means of identifying trends and anticipating future change. From the Environmental Scan the College identified a shift in age and racial demographics, static educational attainment, and higher than average levels of sustained regional poverty in comparison to national metrics.

In the fall of 2015, the College engaged students, staff, faculty, and community groups in a series of facilitated conversations about the College and perceived community needs. Further discussions and analytic exercises with focus groups formed the basis for follow-up sessions with internal constituents.

In the winter of 2015, the District Governing Board reviewed the progress to date and crafted the vision statement for the 2016 – 2020 Strategic Plan. The Board embraced the Plan's goals, objectives, and strategies that align with community efforts to improve economic conditions in the County and to increase educational attainment throughout the service area, with specific focus on underserved populations.

Additional focus sessions throughout the spring of 2016 further refined the Strategic Plan, and assisted the College with selecting metrics and measurements aligned with both the Vision of the District Governing Board and the statewide Goals of the Arizona Attainment Alliance.

The 2016 – 2020 Strategic Plan is informed by data and exists at the confluence of Vision and Action. Through the focused and intentional allocation of human and financial resources as guided by the Strategic Plan, the College will work with community partners to build a strong and prosperous future for Mohave County.

Mission: “The mission of Mohave Community College is to be a learning-centered institution, serving all constituencies, inspiring excellence through innovation and empowering students to succeed.”

Vision 2019: “The work and service of Mohave Community College will be directed toward increasing countywide educational attainment levels and contributing to the economic growth and resilience of Mohave County.”

EDUCATIONAL ATTAINMENT AND STUDENT SUCCESS	COMMUNITY OUTREACH, INVOLVEMENT, AND PARTNERSHIPS	SUSTAINABLE FUTURE
<p>GOAL ONE <i>MCC will drive educational attainment and student success.</i></p>	<p>GOAL 2 <i>MCC will enhance its value to the community by strengthening its outreach, involvement, and partnerships.</i></p>	<p>GOAL 3 <i>MCC will plan and manage sustainable, quality growth.</i></p>
OBJECTIVES	OBJECTIVES	OBJECTIVES
<ul style="list-style-type: none"> • Institutionalize a philosophy of student success • Offer competitive academic programs that meet student and community needs and opportunities • Provide teaching and learning environments that foster excellence and encourage inquiry/creativity • Strengthen the College’s policies, processes, and business practices to facilitate student access • Strengthen student support services to facilitate student completion • Cultivate a campus environment that encourages student success and engagement • Support initiatives that close the achievement gap for underserved populations in our communities 	<ul style="list-style-type: none"> • Promote a positive image of the College and raise awareness of its strengths • Strengthen relationships with business, educational, governmental and non-profit organizations in support of regional workforce and economic development • Expand current and create new partnerships to engage multiple sectors of the community in civic engagement activities, with particular focus on underserved communities • Provide opportunities for greater engagement between the College and the community 	<ul style="list-style-type: none"> • Develop and Implement an Integrated Enrollment Management Plan • Align financial and human resources to the changing needs of the external environment • Raise external funds to augment College Affordability • Encourage an internal climate that embraces and implements Core College Values • Create a climate that is willing to challenge existing structures and practices to improve outcomes
STRATEGIES	STRATEGIES	STRATEGIES
<ul style="list-style-type: none"> • Develop new programs, credit and non-credit, certificates and degrees which are based on comprehensive labor market research • Engage all employees in a continuous, comprehensive process of program improvement • Engage community partners in actively assessing curricula and program content to meet market demands and standards • Collaborate with local high schools to align curriculum • Incorporate Workplace Readiness across the curriculum • Promote problem solving approaches and thinking skills that foster student success • Develop and implement a structure for students to participate in civic engagement and service learning projects • Expand opportunities for peer-to-peer instructional feedback for both veteran and novice teachers • Explore new models of multi-campus instructional delivery • Expand opportunities for students to credential using military, work history, and other forms of external and experiential learning • Design and deliver an effective and engaging new student orientation program • Strengthen the College-wide comprehensive student success plan and design initiatives to support underserved and/or at-risk populations • Enhance advising and services to ensure all first-year students receive individualized success planning • Explore the feasibility of providing Childcare through direct service or partnerships • Strengthen on-campus student employment outcomes • Offer diverse student life programming and activities 	<ul style="list-style-type: none"> • Strategically enhance MCC’s involvement in community organizations • Foster partnerships to deliver county-wide cultural, artistic, and academic programming; • Capitalize on Foundation outreach and events • Conduct ongoing scans of local, state and regional economic trends to anticipate workforce development needs • Explore regional pre-apprenticeship and apprenticeship opportunities • Work directly with local and county economic development partnerships to provide comprehensive workforce training opportunities and solutions to prospective businesses exploring relocation to the service area • Increase and expand opportunities for dual/concurrent high school enrollment • Design and implement a college transition pathway for at-risk and/or and institutionalized youth and adults • Expand College presence in pre-high school grades • Drive the development and implementation of a comprehensive plan to address K-12 teacher recruitment and retention in Mohave County • Establish Operations Plan for Corporate and Community Education • Promotes a calendar of themes and events that promote multicultural awareness to local communities, and secure resources to support these offerings. 	<ul style="list-style-type: none"> • Explore and develop options for alternative revenue sources • Use targeted marketing and communication to expand student enrollment in low-penetration and/or underserved populations • Develop a Strategic Technology Plan • Optimize College operations to align with current and emerging community needs while ensuring efficiency of operations • Explore alternative energy systems and resource conservation efforts to generate new programs, alternative revenue streams, and/or cost savings. • Preserve affordability while investing in innovation to ensure long-term College stability • Engage professional fundraising counsel to externally assess the feasibility of a comprehensive campaign. • Develop an Annual Grant Development Plan that is based on the College’s Strategic Action Plan • Align staffing to match College operational needs and strategic plan priorities • Develop and implement a new Master Facilities Plan to improve the physical and learning environments of the College • Develop a Recruitment/Retention Plan for College employees • Develop succession planning for key positions in each division of the institution • Develop a comprehensive professional development plan for all employees • Prioritize the safety of the campus and the security of students and staff • Develop and maintain Process & Communications Plan with the goal of ensuring consistency and timeliness • Cultivate an inclusive college climate that recognizes, respects, and celebrates local and global multiculturalism and integrates application of these principles across the institution

APPENDIX A.

STRATEGIC PLAN EXAMPLES OF ACTIONS

Goal 1. *MCC will drive educational attainment and student success.*

- Credit for Prior Learning; Competency Based Education*¹; Apprenticeship
- “Transition to College” programming*
- Student Success Plan*
- Redesign Student Success Courses*; Early/continuous career advising
- Awareness training on the Culture of Poverty
- Evaluate and upgrade current technology to deliver synchronous distance courses*

Goal 2. *MCC will enhance its value to the community by strengthening its outreach, involvement, and partnerships.*

- Deliver community programming that improves the quality of rural life*
- Expand MCC EDU program; broaden dual enrollment opportunities for EDU; post-baccalaureate internship opportunities
- Convene an “Education Summit” with County Superintendents and 4-year University partners to chart a path forward that addresses teacher shortages and turnover in the County.
- Faculty and staff tell the MCC Story at community events; College supports employee memberships in civic organizations and community boards
- Seek specialized accreditation and certification for in-demand, high skill jobs*; Industry support for specialized programs

Goal 3. *MCC will plan and manage sustainable, quality growth.*

- Develop & implement a comprehensive marketing/recruitment plan
- Expand student access to scholarships*; Student work programs
- Competitive employee salary and benefits*
- Leadership Academy; Management Training Institute; Peer-to-Peer Faculty Mentoring Program; Committee chair development
- College wide initiative to inform all personnel on College Process and Communications
- Explore job-sharing, telecommuting, flex-hours, strategic closures

APPENDIX B.

S.W.O.T. Executive Summary

The quality and dedication of Mohave Community College faculty and staff, the caliber of its vocational and allied health programs, and the College’s commitment to investing in technology that promotes educational attainment and/or institutional efficiency, were identified as major strengths of the institution.

MCC faces challenges from external competitors to its traditional market. Private 2-year and 4-year Colleges and University are actively recruiting students in Mohave County. These institutions provide a high level of personal, customized service that rapidly facilitates admission. These institutions are entrepreneurial, and aggressive – and are tailoring their message to appeal to targeted demographics in new markets. As the demographics of the County change, MCC will face strong competition from these institutions to serve the emerging market of Hispanic students.

MCC struggles with brand recognition within its own Market. A small, but significant, proportion of the County still does not know that there is a College in Mohave County. A larger portion of the service area believes: 1) the College only supports transfer to state Universities, 2) the College is only a trade school, and/or 3) a higher education degree or certificate from MCC is financially out of reach. Despite, or perhaps because of, its affordability and physical presence within the major population centers of the County, there is a perception that a degree from MCC is somehow worth less than a degree from a 4-year University or private College. This is particularly true among recent high school graduates, where the College’s penetration rate hovers around 30%. Current MCC students cite the “community college stigma” and a perceived lack of Student Life Activities as contributing factors for potential students selecting to go elsewhere.

The low-level of educational attainment in the community limits the pool of local talent and causes the College to struggle with the local recruitment of highly qualified faculty, staff, and administrators. County poverty, climate, and “ruralness” then affect the College’s ability to retain imported talent. Through an emphasis on staff development and review of hiring practices, MCC has an opportunity to foster a faculty, staff, and administration with a demonstrated commitment to student achievement, and an understanding of and respect for the cultural traditions and ethnic diversity of an evolving Mohave County.

The College has satisfied the last of its long-term debt obligations and, with the completion of Student Services Building in Kingman, it will have replaced or remodeled all of the priority one facilities in the Southern Campuses. **The College is in a strong financial position, and now has the ability to strategically invest in those initiatives that build institutional capacity to serve the changing needs of Mohave County.**

* Indicates an item that is a continued or expanded Strategic Funding Priority

APPENDIX C.

Environmental Scan Executive Summary (2016 – 2020)

The demographics of Mohave County are changing. There is strong growth in the 55+ age demographic. K-12 enrollments are declining throughout Southern Mohave County, thus reducing the number of potential traditionally aged students in the MCC pipeline. From 2009 – 2014, the population of white, non-Hispanic, individuals declined in multiple age categories under 55+ years of age. The reverse was true of the Hispanic population, which grew across most age categories. From 2015 to 2019, the Southern Service Area of Mohave Community College is expected to grow by nearly 4,000 individuals, with Hispanic individuals accounting for 57% of that growth.

The Northern Service, extending from the North Rim of the Grand Canyon draws students from northern Mohave County, as well as from Kane and Washington Counties in Utah and from northern Coconino County, Arizona. Though potentially serving a large geographic area, the direct service area (Colorado City, Centennial Park, and Kane Beds, Arizona and Hildale, Utah) accounts for less than 5% of the total population of Mohave County. The age distribution of the northern portion of the service area differs significantly from the south, with an average age of 16.2 years for the communities of Hildale, Colorado City, and Centennial Park.

The last economic recession had a significant impact on the number of jobs in Mohave County and its surrounding service area, most significantly in the Construction Industry. As jobs were lost in Mohave County, enrollments in Mohave County School Districts began to decline. While there has been some recovery in School District enrollments, most districts have yet to rebound to pre-recession levels. A notable exception is in the Northern Service area, where changes in community leadership have resulted in increasing K-12 enrollments (despite some declines in total population).

There is a shortage of effective teachers and high turnover rates of educators in Arizona schools and districts. This lack of stability is mirrored in Mohave County, where turnover in the teacher workforce creates challenges for the long-term educational attainment levels of the County.

The major industries serving Mohave County are Casino Hotels, Local Government, Elementary & Secondary Education, Hospitals, and Restaurants. Among these, employment opportunities at Hospitals are growing at the fastest rate.

2. Anticipating the Changing Educational Needs of Our Service Area (Compare 2009 through 2013)

Age Indicators	United States		Arizona		Southern Mohave County		Colorado City Arizona	
	2009	2013	2009	2013	2009	2013	2009	2013
Median Age (years)	35.4	37.5	34.9	36.8	45.9	49.2		16.2
Age dependency ratio	5.91	5.98	6.50	6.60	7.94	8.21		
Old-age dependency ratio	2.05	2.26	2.17	2.55	4.02	4.74		
Child dependency ratio	3.86	3.72	43.3	4.05	3.92	3.47		

a. Dependency Ratio

A useful metric to consider when looking at age distribution is the dependency ratio, which is a proxy for members of society who are most likely to depend on public services. The measure compares people over 65 and less than 18 years of age to those of working age. In Southern Mohave County the age dependency ratio is 8.21. This means that for every 10 people living in the county, approximately EIGHT are considered “dependent” and the

remaining two are in the workforce supporting them. Not everyone of working age is actually employed as some are stay-at-home parents or full-time caretakers of their parents.

If the 8.21 number is broken down into the two categories of over 65 years of age and under 20, youth comprise less than half of the dependents at 3.47 and **those over 65 are 4.74**. This relatively high proportion of dependent children is significant because the burden of support for families with children falls primarily on local governments through spending on elementary and secondary education and other programs. By contrast, the federal government subsidizes most programs for those aged 65 and older.

The age dependency ratio for the Northern Service area is likely in 8.21 range as well, but for the opposite reason (Child Dependency Ratio extremely high).

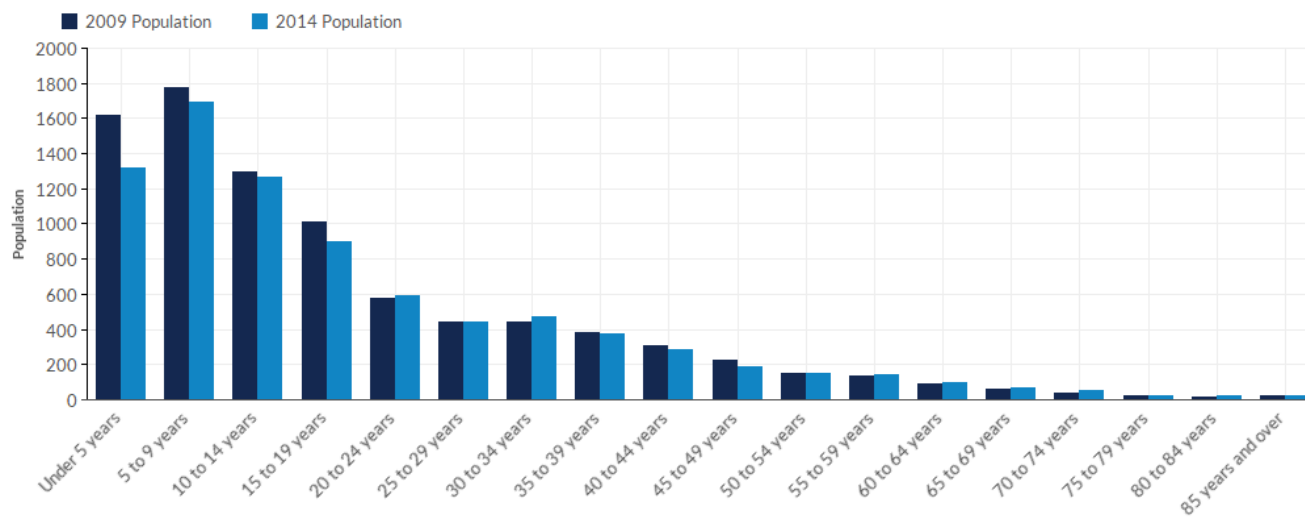

- b. Age
 - Southern Mohave County is getting significantly older
 - Northern Mohave County is VERY young
- c. Age Distribution
 - Nearly half of the Southern population is 50 years of age or older.
 - Nearly half of the Northern population is 16 years of age or younger

- i. The Racial/Ethnic and Age characteristics of Southern Mohave County and the neighboring communities of Laughlin and Needles have shifted significantly in the period between 2009 and 2014.
- ii. We are seeing a population decline in the age classes between 0 and 19 years of age, with the most significant declines under 5 years of age and between 15 to 19 years of age. The White non-Hispanic demographic is responsible for the bulk of the emigration out of the County, but declines are evident in most demographics. Native American and Mixed Race (both Hispanic and non-Hispanic) show increases within some age classes between 0 and 19 years of age.
- iii. The 20-24 age class shows the highest increase among the age classes under 55 years of age, but large increases are also noted in the 25 to 29 and the 30 to 34 age classes. Increases in the age group between 20 and 34 years of age occur across most Racial/Ethnic demographics, with the largest gains among White (Hispanic) and White (Non-Hispanic) groups.
- iv. We are seeing a population decline in the age classes between 35 and 54 years of age. A higher number of white, non-Hispanic, individuals left the age demographic than was reflected by the total age class decline, as white non-Hispanic emigration was partially off-set by increases in Hispanic in the Hispanic population.

School District Enrollment (Compare 2005 through 2013)
